

Medical devices spending in Canada 2013-2017

Description

Produced by CHPI's 2018 Access to Medical Devices research program. This study examines medical devices spending in Canada 2013-2017. The analysis accounts for factors like changes in currency exchange rates, population, inflation, GDP and total healthcare spending. Canada is also ranked versus 75 countries, with a separate ranking versus the 25 wealthiest OECD countries.
